

Nova, Inc.

PHILOSOPHY OF SERVICES

It is the philosophy of NOVA to provide a broad spectrum of services that are meaningful and congruent with the dreams of the people we support. Being self determined, or in charge of our dreams and our lives, is a freedom that every American enjoys and deserves. At NOVA, our caregivers and management team strive to bring a sense of family to our services. This brings a personal touch to everything we do. Together we find ways to nurture dreams of the people we serve to make a positive difference in each individual. We have a deep belief in and commitment to the philosophy of Gentle Teaching. We know that every person will be more successful in attaining their dreams and becoming a part of their community when they have a feeling of being safe and loved. We also know that being a part of the community means connecting with fellow citizens in a positive way. These connections, or natural supports, are vital to our growth. It is the way in which our participants and their families can enrich their lives, and give enrichment back. This is the cornerstone of being safe and loved in our community; and the foundation of services at NOVA.
